Where to find us ?

Few words about us

SENSO is a company based in Mataró at 30 Km. north of the Barcelona area.

Our activity is electronic instrumentation and sensors for temperature measurement and control. Our 60% of turnover is on the plastic injection moulding industry. In this field we have the knowledge to design and manufacture hot runner systems, hot halves, of course hot runner temperature controllers but we also offer a full maintenance service for the electrical side of the mould: mould cleaning, rewiring, spare parts replacement etc...

You will find us at:
